NEW...

ROTARY BOLL & SAND CLEANER

This machine separates unginnged cotton bolls. Long Jute Twigs (sutly) & plastics threads, big leaves / impurities & also separates fine sand for improving seed cleaning working.

This new concept is simple & efficient working for separating bolls / impurities & fine sand. This improves seed cleaning efficiency & minimize choking of trays.

This machine fabricated from heavy duty steel frame, drum having perforation lining with spiral blade for material movement & separation.

Seed separates from the drum pass through conveyor having perforation through for separating the fine sand & pre cleaned cottonseed will be carried to silo/ seed cleaner.
