**BEANS**

**SEEDS**

**NUTS**

### **UNIQUE FEATURES**

SIMPLE ADJUSTMENTS  
AND OPERATIONAL  
FRIENDLY.

PRACTICALLY NO  
MAINTENANCE  
AND EASY TO SERVICE.

HIGH CAPACITY MACHINE  
WITH EXCELLENT RESULTS.

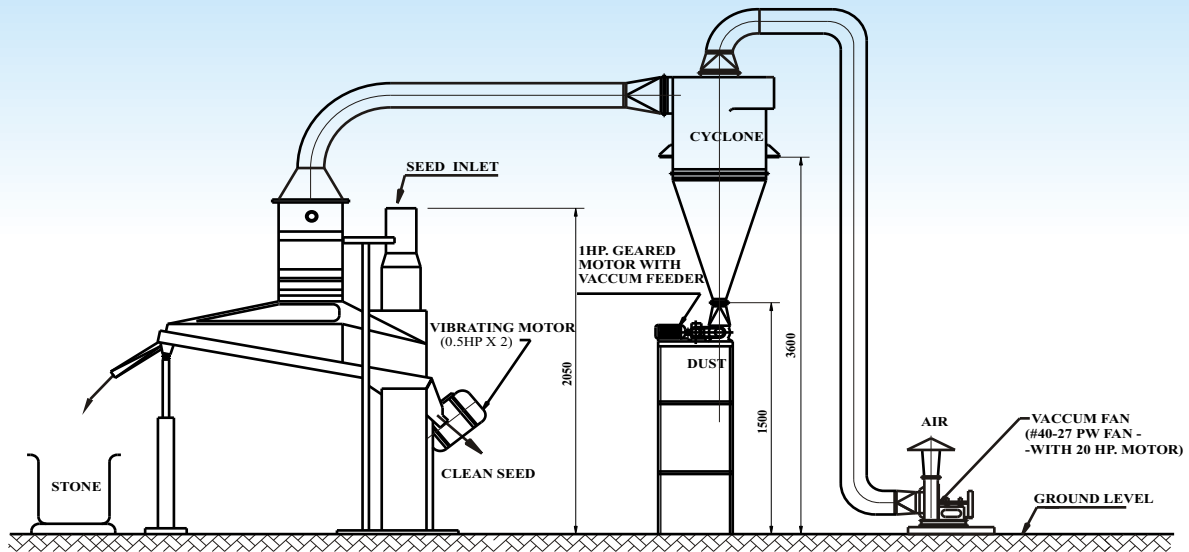

LESS POWER CONSUMPTION.  
DUST FREE AND LOW

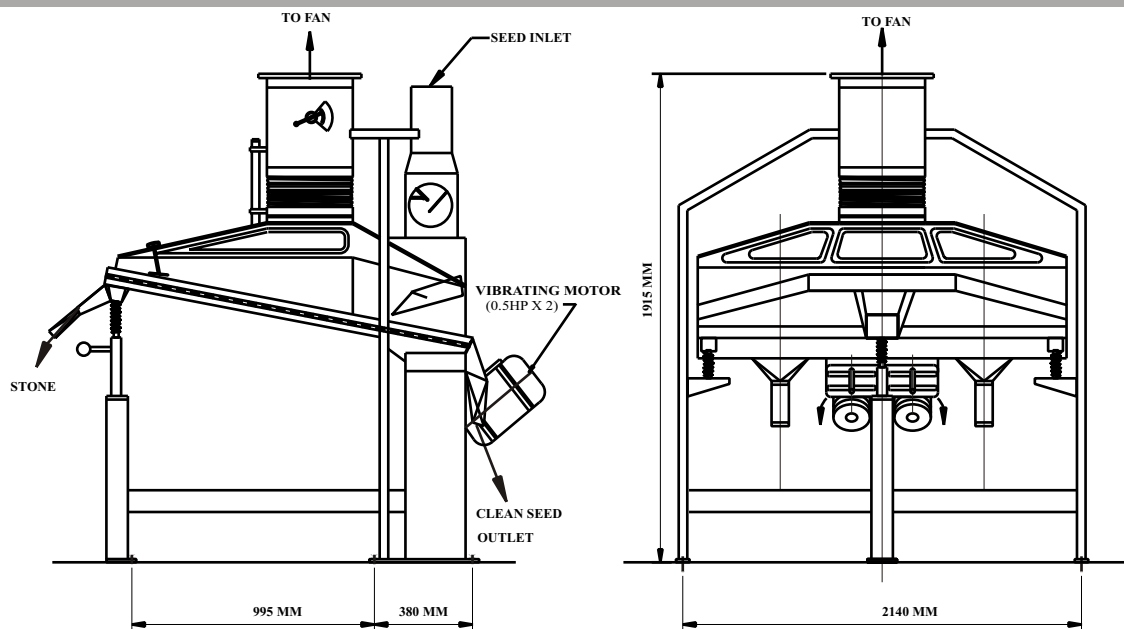

New model, scientifically designed, vacuum operated destoner Machine. This machine is totally closed, with 2 nos. Vibratory motors. It is made from high quality material for long life Low maintenance and trouble free operation.

**Soyabean / Oil seed processing plant, Maize Starch factories, Roller flour mills, Rice mills and other Foods industries.**

# SPECIFICATIONS: DRY DESTONER

DRY DESTONER WITH VACCUM SYSTEM.

DRY DESTONER

## OPERATION :

The input material should be cleaned before feeding into the destoner.

The destoner is used to separate Stone, Glass, Metal pieces and other impurities present in soyabean, maize, grain, rice, wheat, pulses, sunflower seeds and other seeds.

The principle of this machine is to lift the material by vacuum, over an inclined vibrating screen covered deck. This results in the material, being suspended in the air, the heavier impurities (i.e. Stone, Glass, metal) are left behind on the screen and are discharged from the stone outlet.

Perfectly clean soyabean, maize, grain and other seeds are then discharged from the outlets, free from all impurities.
